Daily Bugle

Daily Bugle

Set #76178

The LEGO Group. (n.d.). Diagon Alley™. Retrieved 2022, from <https://www.lego.com/en-ca/product/diagon-alley-75978>.

Module Description

The Daily Bugle's antenna, crowned with a pulsating red light, elegantly illuminates when a passing vehicle triggers its sensor.

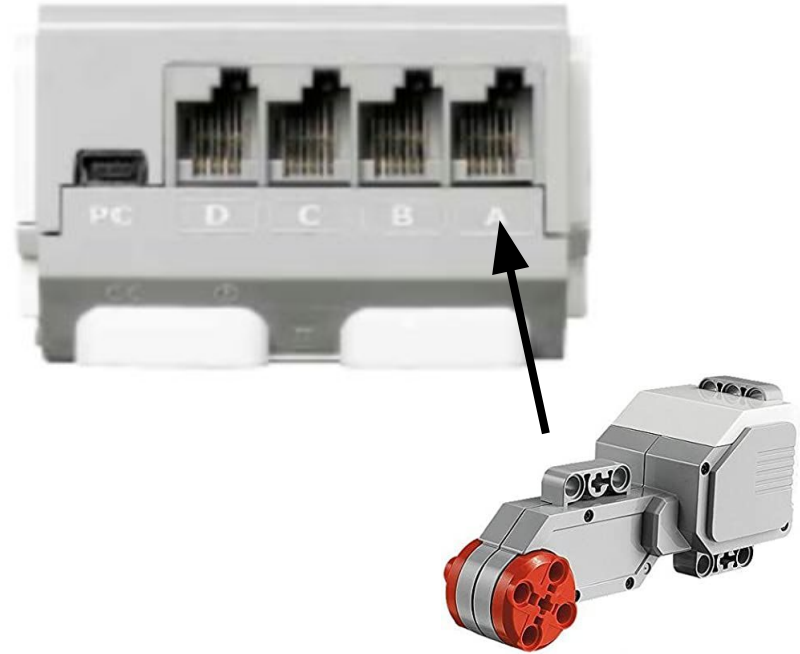

Sensors

The output will be a Color & Distance sensor which will be detecting motion in front of the building's street.

Ports

Daily Bugle will require one output port on an EV3 hub to connect a sensor. Sensor will be sending signal to the tower light through a wire.

Variables/Settings

Status: When a vehicle passes in front of the tower, status switches to **on**. When on, the red light on the tower will blink at **interval** of **3** seconds. Status returns to **off** after that.

Interval can be changed.

💡 Click here to ask Blackbox to help you code faster

```
1  {  
2    "Status" : "on",  
3    "Interval" : 3  
4  }
```

IOT Loop

While True

 If status == "on"

 If counter % 3 == 0
 Turn off the light

 Else
 Turn on the light
